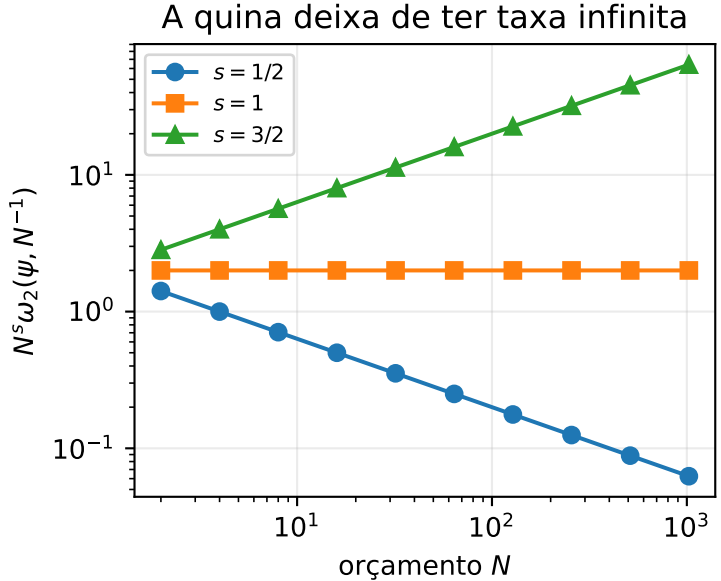
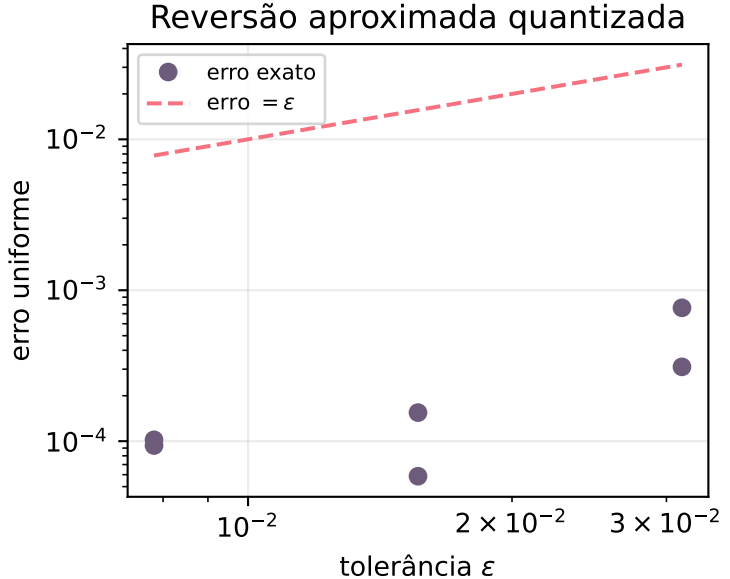
Agudeza do expoente inverso
pente crítico
inclinação 1/2
amplitude
meia-largura h



A quina deixa de ter taxa infinita
$s = 1/2$
$s = 1$
$s = 3/2$
$N^s \omega_2(\psi, N^{-1})$
orçamento N



Reversão aproximada quantizada
erro exato
erro $= \varepsilon$
erro uniforme
tolerância ε
